

Safety data sheet

according to Regulation EC 1907/2006 (REACH) and subsequent amendment Regulation EU 830/2015

SECTION 1. Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

| | |
|---------------|--------------------------------------|
| Code: | ECID 01343-19-00028 |
| Product name: | LA TABACCHERIA Black Line Kentucky 3 |

1.2. Relevant identified uses of the substance or mixture and uses advised against

| | | | |
|----------------------|--|--------------|----------|
| Description/Use | Base with nicotine/ Unflavoured e-liquid | | |
| Intended use: | Industrial | Professional | Consumer |
| Electronic cigarette | | X | X |

1.3. Details of the supplier of the Safety Data Sheet

| | |
|---|--|
| Name: | La Tabaccheria di Orlando D'Alessandro |
| Full address: | Via Frattamaggiore, 22 00132 - Roma |
| District and Country: | Italy - 00393934560139 - Fax. |
| E-mail address of the competent person responsible for the Safety Data Sheet: | info@latabaccheria.net |

1.4. Emergency telephone number

| | |
|--------------------------------|---|
| For urgent inquiries refer to: | 00393934560139; info@latabaccheria.net; NHS 111 |
|--------------------------------|---|

SECTION 2. Hazards identification

2.1. Classification of the substance or mixture

The product is classified as hazardous pursuant to the provisions set forth in EC Regulation 1272/2008 (CLP) (and subsequent amendments and supplements). The product thus requires a Safety Data Sheet that complies with the provisions of EC Regulation 1907/2006 and subsequent amendments. Any additional information concerning the risks for health and/or the environment are given in sections 11 and 12 of this sheet.

Hazard classification and indication:

| | | |
|--------------|------|----------------------|
| Acute Tox. 4 | H302 | Harmful if swallowed |
|--------------|------|----------------------|

2.2. Label elements

Hazard labelling pursuant to EC Regulation 1272/2008 (CLP) and subsequent amendments and supplements

Hazard pictograms:

Signal words: Warning

Hazard statements:

H302 Harmful if swallowed

Precautionary statements:

P101 If medical advice is needed, have product container or label at hand.

P102 Keep out of reach of children.

P264 Wash ... thoroughly after handling.

P301 + P312 IF SWALLOWED: Call a POISON CENTER/doctor/.../if you feel unwell.

P330 Rinse mouth.

P501 Dispose of contents/container in accordance with local regulations.

Contains:

Nicotine

Product not intended for uses provided for by Dir.2004/42/CE.

2.3. Other hazards

On the basis of available data, the product does not contain any PBT or vPvB in percentage greater than 0.1%.

SECTION 3. Composition/information on ingredients

3.1. Substances

Information not relevant

3.2. Mixtures

Contains:

The full wording of hazard (H) phrases is given in section 16 of the sheet.

| Identification | % | Classification 1272/2008 (CLP) |
|----------------|--------------------|---|
| Nicotine | $0.21 < x < 0.266$ | Acute Tox. 2 H300; Acute Tox. 2 H310; Acute Tox. 2 H330; Aquatic Chronic 2 H411 |

CAS: 54-11-5

EC: 200-193-3

INDEX: 614-001-00-4

REACH: 01-2120066934-47-XXXX

SECTION 4. First aid measures

4.1. Description of first aid measures

EYES: Remove contact lenses, if present. Wash immediately with plenty of water for at least 15 minutes, opening the eyelids fully. If

problem persists, seek medical advice.

SKIN: Remove contaminated clothing. Rinse skin with a shower immediately. Get medical advice/attention immediately. Wash contaminated clothing before using again.

INHALATION: Remove to open air. If the subject stops breathing, administer artificial respiration. Get medical advice/attention immediately.

INGESTION: Get medical advice/attention immediately. Do not induce vomiting. Do not administer anything not explicitly authorized by a doctor.

PROTECTION MEASURES FOR FIRST RESPONDERS: Concerning PPE suitable for first aid operations, please refer to section 8.2 of this safety data sheet.

4.2. Most important symptoms and effects, both acute and delayed

Specific information on symptoms and effects caused by the product are unknown. For symptoms and effects caused by the contained substances, see chap. 11.

4.3. Indication of any immediate medical attention and special treatments needed

Information not available

SECTION 5. Firefighting measures

5.1. Exstinguishing media

SUITABLE EXTINGUISHING EQUIPMENT

The extinguishing equipment should be of the conventional kind: carbon dioxide, foam, powder and water spray.

UNSUITABLE EXTINGUISHING EQUIPMENT

Do not use water jets. The water is not effective to extinguish a fire, however it can be used to cool the closed containers next to the flame and prevent explosion.

5.2. Special hazards arising from the sustance or mixture

HAZARDS CAUSED BY EXPOSURE IN THE EVENT OF FIRE

Do not breath combustion products

5.3. Advice for firefighters

GENERAL INFORMATION

Use jets of water to cool the containers to prevent product decomposition and the development of sustances potentially hazardous for health. Always wear full fire prevention gear. Collect extinguishing water to prevent it from drying into the sewer system. Dispose of contaminated water used for extinction and the remains of the fire according to applicable regulations.

SPECIAL EQUIPMENTS FOR FIREFIGHTERS

Normal firefighting clothing i.e. fire kit (EN 469), gloves (EN 659) and boots (HO specification A29 and A30) in combination with self contained open circuit positive pressure compressed air breathing apparatus (EN 137).

SECTION 6. Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

Block the leakage if there is no hazard.

Wear suitable protective equipment (including personal protective equipment referred to under Section 8 of the Safety Data Sheet) to

prevent any contamination of a skin, eyes and personal clothing. These indications apply for both processing staff and those involved in emergency procedures.

6.2. Environmental precautions

The product must not penetrate into the sewer system or can into contact with surface water or ground water

6.3. Methods and material for containment and cleaning up

Collect the leaked product into a suitable container. If the product is flammable, use explosion-proof equipment. Evaluate the compatibility of the container to be used for, by checking Section 10. Absorb the remainder with inert absorbent material. Make sure the leakage site is well aired. Contaminated material should be disposed in compliance with the provisions set forth in point 13.

6.4. References to other sections

Any information on personal protection and disposal is given in Sections 8 and 13.

SECTION 7. Handling and storage

7.1. Precautions for safe handling

Before handling the product, consult all the other sections of this material Safety Data Sheet. Avoid leakage of the product into the environment. Do not eat, drink or smoke during use. Remove any contaminated clothes and personal protective equipment before entering places in which people eat.

7.2. Conditions for safe storage including any incompatibility

Store only in the original container. Store the containers sealed, in a well ventilated place, away from direct sunlight. Keep containers away from any incompatible material, see Section 10 for details.

7.3. Specific end use(s)

Information not available

SECTION 8. Exposure controls/personal protection

8.1. Control parameters

Substance name: **Glycerol**

CAS: 56-81-5

| 8.2. Exposure controls |

LA TABACCHERIA Black Line Kentucky 3

As the use of adequate technical equipment must always take priority over personal protective equipment, make sure that the workplace is well aired through effective local aspiration. Personal protective equipment must be CE marked, showing that it complies with applicable standards.

HAND PROTECTION

Protect hands with category III work gloves (see standard EN 374).

The following should be considered when choosing work glove material: compatibility, degradation, failure time and permeability.

The work gloves' resistance to chemical agents should be checked before use, as it can be unpredictable. The gloves' wear time depends on the duration and type of use.

SKIN PROTECTION

Wear category I professional long-sleeved overalls and safety footwear (see Directive 89/686/EEC and standard EN ISO 20344). Wash body with soap and water after removing protective clothing.

EYE PROTECTION

Wear airtight protective goggles (see standard EN 166).

In the presence of risks of exposure to splashes or squirts during work, adequate mouth, nose and eye protection should be used to prevent accidental absorption.

RESPIRATORY PROTECTION

If the threshold value (e.g. TLV-TWA) is exceeded for the substance or one of the substances present in the product, a mask which class must be chosen according to the limit of use concentrations. (see standard EN 14387). In the presence of gases or vapours of various kinds and/or gases or vapours containing particulate (aerosol sprays, fumes, mists, etc.) combined filters are required.

Respiratory protection devices must be used if the technical measures adopted are not suitable for restricting the worker's exposure to the threshold values considered. The protection provided by masks is in any case limited.

If the substance considered is odourless or its olfactory threshold is higher than the corresponding TLV-TWA and in the case of an emergency, wear open-circuit compressed air breathing apparatus (in compliance with standard EN 137) or external air-intake breathing apparatus (in compliance with standard EN 138). For a correct choice of respiratory protection device, see standard EN 529.

ENVIRONMENTAL EXPOSURE CONTROLS

The emissions generated by manufacturing processes, including those generated by ventilation equipment, should be checked to ensure compliance with environmental standards.

SECTION 9. Physical and chemical properties**9.1. Information on basic physical and chemical properties**

| | |
|--|----------------|
| Appearance: | Liquid |
| Colour: | Various |
| Odour: | Characteristic |
| Odour threshold : | Not available |
| pH: | 7.00 - 9.00 |
| Melting point / freezing point: | Not available |
| Initial boiling point: | Not available |
| Boiling range: | Not available |
| Flash point: | > 60 °C |
| Evaporation rate: | Not available |
| Flammability (solid, gas): | Not applicable |
| Lower inflammability limit: | Not available |
| Upper inflammability limit: | Not available |
| Lower explosive limit: | Not available |
| Upper explosive limit: | Not available |
| Vapour pressure: | Not available |
| Vapour density: | Not available |

| | |
|--|-----------------------------|
| Relative density: | 1.0 - 1.3 g/cm ³ |
| Solubility: | Not available |
| Partitiion coefficient: n-octano/water: | Not available |

| Oxidising properties: | Not available |

9.2. Other information

Information not available

SECTION 10. Stability and reactivity

10.1. Reactivity

There are no particular risks of reactions with other substances in normal conditions of use

10.2. Chemical stability

The produc is stable in normal conditions of use ad storage

10.3. Possibility of hazardous reactions

No hazardous reactions are foreseeabe in normal conditions of use and storage

10.4. Condition to avoid

None in particular. However, the usual precautions used for chemical products should be respected

10.5. Incompatible materials

Information not available

10.6. Hazardous decomposition products

Information not available

SECTION 11. Toxicological information

In the absence of experimental data for the product itself, health hazards are evaluated according to the properties of the substances it contains, using the criteria specified in the applicable regulation for classification. It is therefore necessary to take into account the concentration of the individual hazardous substances indicated in section 3, to evaluate the toxicological effects of exposure to the product.

11.1. Information on toxicological effects

Acute toxicity

ATE_{mix} (Inhalation - vapours): Not Applicable
ATE_{mix} (Inhalation - mists / powders) of the mixtures: 71.46 mg/L
ATE_{mix} (Oral): 1880.63 mg/kg
ATE_{mix} (Dermal) of the mixtures: 26328.75 mg/kg

Nicotine
ATE Oral 5 mg/kg bw - ECHA
ATE Dermal 70 mg/kg bw - ECHA
ATE Inhalation 0.19 mg/L - ECHA

Skin corrosion / Skin irritation

Does not meet the classification criteria for this hazard class

Serious eye damage / Irritation

Does not meet the classification criteria for this hazard class

Respiratory or skin sensitisation

Does not meet the classification criteria for this hazard class

Germ cell mutagenicity

Does not meet the classification criteria for this hazard class

Carcinogenicity

Does not meet the classification criteria for this hazard class

Reproductive toxicity

Does not meet the classification criteria for this hazard class

STOT – Single exposure

Does not meet the classification criteria for this hazard class

STOT – Repeated exposure

Does not meet the classification criteria for this hazard class

Aspiration toxicity

Does not meet the classification criteria for this hazard class

SECTION 12. Ecological information

Not being data available, use this product according to good working practices. Avoid littering. Inform the competent authorities, should the product reach waterways or contaminate soil or vegetation.

12.1. Toxicity

Not classified for acute hazards (no significant component). Not classified for chronic hazards (no significant component)

12.2. Persistence and degradability

Information not available

12.3. Bioaccumulative potential

Not determined

12.4. Mobility in soil

| |
|--|
| Information not available |
| 12.5. Results of PBT and vPvB assessment |
| On the basis of available data, the product does not contain any PBT or vPvB in percentage greater than 0.1% |
| 12.6. Other adverse effects |
| Information not available |
| SECTION 13. Disposal considerations |
| 13.1. Waste treatment methods |
| Reuse, when possible. Product residues should be considered special hazardous waste. The hazard level of waste containing this product should be evaluated according to applicable regulations. Disposal must be performed through an authorized waste management firm, in compliance with national and local regulations. CONTAMINATED PACKAGING Contaminated packaging must be recovered or disposed of in compliance with national waste management regulations. |
| SECTION 14. Transport information |
| The product is not dangerous under current provision of the Code of International Carriage of Dangerous Goods by Road (ADR) and by Rail (RID), of the International Inland Waterways Dangerous Goods Code (ADN), of the International Maritime Dangerous Goods Code (IMDG), and of the International Air Transport Association (IATA/IACAO) regulations. |
| 14.1 UN number |
| Not applicable |
| 14.2. UN proper shipping name |
| Not applicable |
| 14.3. Transport hazard class(es) |
| Not applicable |
| 14.4. Packing group |
| Not applicable |
| 14.5. Environmental hazards |
| Not applicable |
| 14.6. Special precautions for user |

| | |
|---|---|
| Not applicable | |
| | |
| 14.7. Trasport in bulk according to Annex II of MARPOL and the IBC Code | |
| Information no relevant | |
| | |
| SECTION 15. Regulatory information | |
| 15.1. Safety, health and environmental regulatios/legislation specific for the substance or mixture | |
| Seveso Category - Directive 2012/18/EC: | |
| None | |
| Restriction relating to the product or contained substnace pursuant to Annex XVII to EC Regulation 1907/2006 | |
| Product | |
| Point | 3 |
| | |
| Substances in Candidate List (Art. 59 REACH) | |
| On the basis of available data, the product does not contain any SVHC in percentage greater than 0.1% | |
| | |
| Substances subject to authorization (Annex XIV REACH) | |
| None | |
| | |
| Substances subject to exportation reporting pursuant to (EC) Reg. 649/2012 | |
| Nicotine | |
| | |
| Substances subject to the Rotterdam Convention | |
| None | |
| | |
| Substances subject to the StockholmConvention | |
| None | |
| | |
| Healthcare controls | |
| Workers exposed to this chemical agent must not undergo health checks, provided that available risk-assessment data prove that the risks related to the workers' health and safety are modest and that the 98/24/EC directive is respected. | |
| | |
| 15.2. Chemical safety assessment | |
| No chemical safety assessment has been processed for the mixture | |
| | |
| SECTION 16. Other information | |
| Text of hazard (H) indications mentioned in section 2-3 of the sheet: | |
| Acute Tox. 2 | Acute toxicity, category 2 |
| Acute Tox. 4 | Acute toxicity, category 4 |
| Aquatic Chronic 2 | Hazardous to the aquatic environment — Chronic Hazard, Category 2 |
| H300 | Fatal if swallowed |
